

OFFICE PARTITIONS

CEMAC provide a range of partitioning systems which integrate full height glazing with doors and solid walls. This provides an unobtrusive, yet elegant and functional solution to your partitioning requirements.

These systems are suitable not only for large scale projects but also the smaller ones with finishes and colours only an idea away.

REFURBISHMENT

CEMAC has a wealth of experience refurbishing the interior of today's office space to meet our clients business needs.

From upgrading core facilities, as well as toilets, stairwells, and stair doors; to the remodelling of existing entrance foyers, lifts and common areas. CEMAC also upgrade the work area with new ceilings, carpet and new facelifts to existing interior structures.

INTERIOR ALTERATIONS

Cemac offers a complete solution for your office space refurbishments, alterations or additions. We are conscious to avoid interruption to your work schedule, and can tailor the project to accommodate your needs and minimise any disruption.

To suit your ever-changing requirements we can shift walls, doors, glazing – in fact anything you need to make your office environment work for you!

Any alterations or additions are completed with the appropriate matching materials and are finished to provide a seamless presentation for all of your working environment.

ACCESS & COMPUTER FLOORING

www.tasmanaccessfloors.com.au

CEMAC lead the industry in the supply and installation of access flooring for power, data and other applications. The 'Tasman' access floor system provides clients with an access flooring solution which meets all service and distribution requirements whilst guaranteeing a strong, stable and durable flooring surface. Cemac also provide seismic constraints to cater for your specific requirements.

BUILDING CONTRACTORS

CEMAC Commercial Interiors specialise in the construction of quality commercial interior projects, including office partitioning, refurbishments, and shop fit-outs, as well as hospitality and apartment projects.

CONSTRUCTION MANAGEMENT

CEMAC Commercial Interiors provides a complete construction management solution.

These services include application and administration of council and local body requirements, planning approval and the necessary consents if required.

Including: timeframe and budget and manage the subsequent tendering and evaluation processes using only approved contractors and quality materials.

Upon winning a tender CEMAC will appoint sub-trades, and closely monitor performance to timeframes and budget. For your peace of mind we provide quality assurance processes every step along the way.

ESTIMATION

In addition to winning tenders for the many projects CEMAC carry out, if required we also have a budget pricing service at no obligation.

These services allow our clients to obtain an accurate overall cost on actual or future projects at no cost.

about us

PROJECT TEAM

Each of our projects are allocated a team consisting of a contract manager with ultimate responsibility for the contract from programming through to final completion.

The contract manager is assisted by a quantity surveyor (who prices the contract), for all of the financial administration requirements.

PETER WALKER

Peter's commercial interior experience spans over 25 years. He'll act as your project leader and manages all necessary programming, construction, timing and quality assurance matters throughout the project term.

CHRIS GARRETT

Chris has over 30 years experience in the commercial interiors and construction industry with specialist knowledge in the areas of project and tender pricing, value adjustment and commercial management.
